

Pot grown Christmas trees

A living pot grown Christmas tree

The nursery, Gl. Kirstineberg Planteskole A/S, produces and provides real pot grown Christmas Trees. (*Abies Nordmanniana*).

The tree is a high quality product, completely unique, visually harmonic and beautiful.

The vision was to produce a tree, useable indoor during Christmas time, and afterwards for outdoor purposes in the garden or for example on the balcony.

For the consumer it is a unique and beautiful product. A complete care instruction written in four languages is attached each three for guidance to a lifetime product.

Garden Centre's and do-it-yourself centres do have the possibility to sell the tree during several seasons. It is a great advantage. If the tree is not sold during Christmas, it can also be sold spring or fall, as it is growing in a pot and from the start developing a healthy and vital root system.

PRODUCTION

The nursery, Gl. Kirstineberg Planteskole A/S, only produces high quality pot grown Christmas trees of the variety *Abies Nordmanniana*.

To guarantee a unique product with harmony and beauty the below instructions are carefully followed:

- The tree has been transplanted several times
- The tree has got a healthy and vital root system
- The tree is produced in consideration of the environment.
- Under controlled conditions the trees are given the needed nutrients for a perfect growth.
- During the growing season the trees are graded and pruned to shape.
- The trees are produced in consideration of the environment and surroundings.

SIZES

The trees are produced and sold in the following sizes/heights: 60/80 cm, 80/100 cm, 100/120 cm and up to 120/140 cm.

The height is measured from the top of the edge of the pot to the top of the tree.

GROWTH GUARANTEE

Our specific and specialized production with 4-6 growing seasons guarantees a healthy and vital root system, where the roots remain inside the pot.

Due to fact that the attached care instruction will be followed, we are able to grant the growth of the tree outdoor.

ENVIRONMENT

To meet the consumers demand for environmental information we are members of the MPS system. It is an environmental account.

Every month we report the consumption of remedies. Due to the information of consumption you are classified as an A, B or C producer, with A as the highest classification.

The MPS member is controlled by a judge advocate. The nursery, Gl. Kirstineberg Planteskole A/S, is classified as an A producer.

The transplanted Nordmann Fir Tree is a natural product, consuming and transforming CO2 during the total period of growth.

LOGISTIC

The trees are ready for sale after 4 to 6 growing seasons.

PALLETS SYSTEMS

No. of trees per pallet	50/60 cm	60/80 cm	80/100 cm	100/120 cm	120/140 cm

Gl. Kirstineberg Planteskole offers to handle the logistic of the tree until it has been delivered. The trees can be sent individually in gift boxes, on CT-pallets or in CC-containers.

CONSUMER INFO

Remember to transport the tree carefully after having been purchased.

The tree has to slowly get used to indoor climate and temperature. Furthermore do not place it close to the heating system.

On daily basis the tree needs 300-400 ml. of water.

After Christmas the tree also needs to slowly adjust to the temperatures and climate outdoor.

PLANTING OUT

Following preparations are to be made:

- Consider where in the garden to put the tree - it is constantly growing.
- Before planting the tree into the soil, dig a hole 3 times as large as the size of the pot with the roots. Take away the pot and loosen the roots.
- Put the tree in the middle of the hole and cover with earth again. It is very important to add enough water to the tree, especially during dry seasons.
